

ATTENDANCE ALLOWANCE

Hints and tips on completing the claim form (AA1A July 2017)

Introduction

This document is intended as a guide to support you to complete the questions regarding your personal care on the Attendance Allowance claim form. You must complete all parts of the claim form. You may find it helpful to read our Attendance Allowance factsheet which covers the main criteria.

Before filling in the form

Some points to consider before looking at the care needs part of the claim form:

- Limb loss will not automatically entitle you to Attendance Allowance. It is not the disability or condition that you have, but how that disability or condition affects you that will entitle you the benefit. Individuals react and manage differently so you will find people with the same condition not necessarily having the same benefit entitlement
- Do consider all health conditions or disabilities that you have as well as any limb loss. For example, if you have had an amputation due to poor circulation, do you have any other difficulties due to this such as heart disease?
- When answering questions on how many days / nights a week you have difficulty, you will need to show that this occurs more often than not i.e. at least four days / nights a week. Consider whether even a good day / night for you still means that you have some level of difficulty
- When answering questions on the claim form, try and look at the bigger picture. Do not just look at whether you can complete an activity. Look at how you complete it, describing the process and how long this takes you where necessary
- Consider whether even a good day for you still results in having difficulty with an activity
- The claim form can take some time to fill in, so consider completing it in stages making sure you are aware of any return date for the form

Completing the care needs section

The following hints and tips are intended to support you in completing the care needs part of the claim form. These are suggestions only and are not exhaustive so please consider other difficulties you have that are not mentioned here.

You may find it useful to tick any boxes that apply to you. When you start to complete the claim form you can then transfer all the difficulties that you have identified to the relevant section of the claim form. Make sure that you are clear why you have these difficulties. For

example, if you have ticked the box that states '*Do you get tired or breathless or in pain when washing?*' mention why this is the case when you transfer this to the claim form e.g. could it be because you have heart disease?

Question 27

Getting out of bed in the morning and into bed at night

- How do you feel when you wake?
- Do you have any aches, pains, stiffness, breathlessness?
- Do you have difficulty sitting up, swinging legs out of bed?
